 COMPLIANT

State of the art CAD design

HIC Solid Models

Custom HICs

Fan Drive HICs

## About Us

Comatrol, a member of the Danfoss Group, is the most responsive and innovative choice for Cartridge Valves and Hydraulic Integrated Circuit (HIC) needs. Comatrol works with customers and suppliers around the world to manufacture high performance machine control solutions for mobile, on-highway, energy and industrial equipment markets.

The Cartridge Valve line consists of a strong portfolio of proportional, solenoid and mechanical valves. Comatrol provides pre-engineered customer solutions with Catalog HICs, including Cross-Port Reliefs, Dual Counterbalance, Motor Mount and the new family of Fan Drive HICs.

Comatrol specializes in Custom HICs allowing customers to use our broad portfolio of cartridge valves to create innovative solutions for optimal machine control and performance.

## Our History

Originally a pioneering brand in the European cartridge valve market, Comatrol is a global business built on the strength of our experience and established position within the fluid controls industry. At Comatrol, product focus means product expertise, allowing us to be the market leader in HIC design and prototype speed. Our comprehensive cartridge portfolio brought together by Danfoss, combines three separate product lines allowing customers to buy the best individual components at competitive prices straight from the source.

## Our Experience

Comatrol represents a long history of experience and an established position within the fluid controls industry. Since 1980, we have built upon the knowledge and expertise within the design, application and manufacturing of cartridge valves and HICs to become the preferred component provider for over 1800 companies and distributors throughout the world. Our leadership and engineering team have over 300 years combined fluid power experience and in the words of one of our account managers, "This is all we do and we do it well!"

## Our Products

As a market leader in HIC design, Comatrol has built upon our engineering and application expertise to create a balanced offering with over 500 high quality catalog products including configurable cartridge valves and Catalog HICs to meet your control solutions needs.

## Operational Excellence

Responsiveness resonates throughout every aspect of Comatrol's business. Our aim is to link your request to the supplier network in order to compress lead time and improve quality, providing the most valuable control solutions on the market today. Comatrol's ISO 9001-2008 certified facilities help ensure the delivery of high quality precision products at world class levels.

# EasyValve® Version 3.0

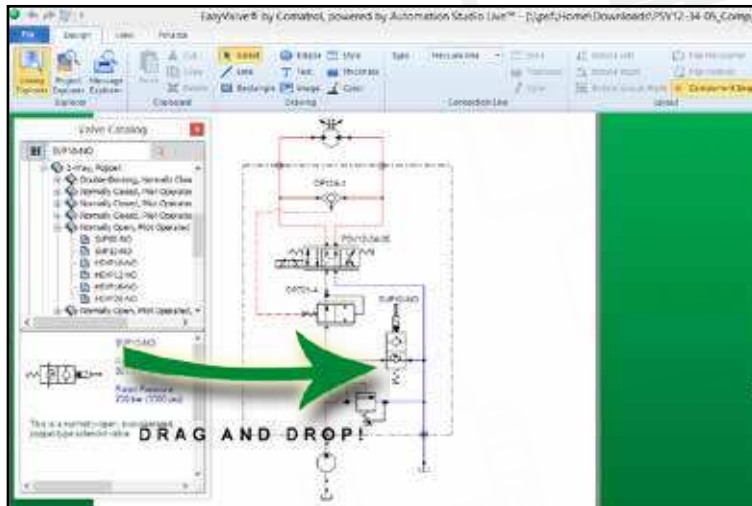

EasyValve –where custom HIC solutions and creativity meet

Our flagship design software EasyValve is the e-destination that takes custom HIC solutions to the next level by providing a streamlined development process from the customer to the Comatrol engineer.

EasyValve’s intuitive user interface allows you to proficiently create your hydraulic circuit schematic by simply dragging and dropping from Comatrol’s complete digital library of cartridge valves, Cetop valves and accessories. Capture your technical, commercial and application requirements to accurately document and communicate your custom HIC needs - allowing you to get exactly what you want from the first drawing, reducing the prototype cycle time by as much as half.

## Features

- Quickly select the products, ports and machining options you need by navigating the library, or by using the search function – then drag and drop onto your Schematic Layout
- Easily configure all of your selected items to meet your application needs with the drop-down component selection functionality
- To help make optimal technical vs. pricing\* decisions, this information is now readily available in one location on the Component Specification page of each item, which also includes the valve catalog pages
- The Project Information View allows you to capture customer, technical, and HIC material information
- The Manifold Layout page allows you to capture customer-critical layout information where you can define the maximum envelope dimensions and the location of valves, ports and mounting holes

**Schematic Layout - Drag and Drop from Library**

**Component Specifications - Configuring Products**

## Shopping Cart Feature

Quickly configure and generate pricing for standard catalog components.

- Outputs Include:
  - o Project file that stores all your work into one document [.HICS]
  - o Project Summary
  - o Schematic in DXF format
  - o Automation Studio™ output [.HIX] to support your simulation needs
- The Project Summary includes:
  - o Customer and Distributor Information
  - o Net price\* and other Commercial Information
  - o Technical Parameters
  - o Schematic
  - o Manifold Layout
  - o Bill of Material
  - o Warnings and Revision History

From inception to installation, EasyValve ensures that the first prototype is the right prototype. Download EasyValve software and see for yourself what responsiveness in motion looks like firsthand.

\*Pricing is only available to Comatrol distributors

## Check Valves - Threaded

		DCP16-2	SDC16-2	#16 SAE, 1 BSP

Many Comatrol cavities are designed around SAE standard O-ring thread ports. In many cases these cavities are interchangeable with cavities used by other manufacturers. The table below is intended as a guide for cartridge valve interchanges.

## Cavity Crossover Table
