^{★1} Various control types are available such as pressure compensator type. Refer to page A-26 and A-27.

^{★2} The maximum operating pressure for each double pump depends on its combination of pumps. Contact us for details.

Hydraulic Fluids

Hydraulic Fluids

Use petroleum based oils such as anti-wear type hydraulic oils equivalent to ISO VG-32 or 46. The recommended viscosity range is from 20 to 400 mm²/s and temperature range is from 0 to 60°C, both of which have to be satisfied for the use of the above hydraulic oils.

Control of Contamination

Due caution must be paid to maintaining control over contamination of the operating oil which can otherwise lead to breakdowns and shorten the life of the unit.

Please maintain the degree of contamination within NAS Grade 10.

The suction port must be equipped with at least a 100 μm (150 mesh) reservoir type filter and the return line must have a line type filter of under 10 μm.

Instructions

Mounting

When installing the pump the filling port should be positioned upwards.

Alignment of Shaft

Employ a flexible coupling whenever possible, and avoid any stress from bending or thrust.

Maximum permissible misalignment is less than 0.1 mm TIR and maximum permissible misangular is less than 0.2°.

Suction Pressure

Permissible suction pressure at inlet port of the pump is between -16.7 and +50 kPa.

For piping to the suction port, use the pipes of the same diameter as that of the specified pipe flange to be used. Make sure that the height of the pump suction port is within one meter from the oil level in the reservoir.

Hints on Piping

When using steel pipes for the suction or discharge ports, excessive load from the piping to the pump generates excessive noise.

Whenever there is fear of excessive load, please use rubber hoses.

Suction Piping

In case the pump is installed above the oil level, the suction piping and suction line filter should be located lower than the pump position to prevent air in the suction line.

When using steel pipes for the suction or discharge ports, excessive load from the piping to the pump generates excessive noise.

Whenever there is fear of excessive load, please use rubber hoses.

Drain Piping

Install drain piping according to the chart and ensure that pressure within the pump housing should be maintained at a normal pressure of less than 0.1 MPa and surge pressure of less than 0.5 MPa.

Length of piping should be less than 1 m, and the pipe end should be submerged in oil.

[Recommended Drain Piping Size]

Model	Fitting Size	Inside Dia. of Pipe
A10, A16, A22	3/8 [Inside Dia. 8.5 mm or more]	10 mm or more
A37, A45	1/2 [Inside Dia. 12 mm or more]	12 mm or more
A56, A70, A90, A100, A145	3/4 [Inside Dia. 16 mm or more]	19 mm or more

Bleeding Air

It may be necessary to bleed air from pump case and outlet line to remove causes of vibration. An air bleed valve (Model Number ST1004-*-10*, Page A-259) is recommended for this purpose.

Starting

Before first starting, fill pump case with clean operating oil via the filling port.

In order to avoid air blockage when first starting, adjust the control valves so that the discharged oil from the pump is returned direct to the reservoir or the actuator moves in a free load.

[Volume of Pre-fill Oil Required]

Model	Volume cm ³
A10	370
A16/A22	600
A37/A45/A56	1200
A70	2100
A90/A100	2500
A145	3300

Setting Discharge Pressure and Delivery

At the time of shipment, the unit has been preset to maximum delivery and minimum discharge pressure.

Adjust the preset delivery and pressure to meet your system requirements.

Adjustment of Discharge Pressure

Turning the adjustment screw clockwise, increases pressure.

[Volume adjusted by each full turn of the pressure adjustment screw]

Model Numbers	Adjustment Volume MPa
A10-FR01B	2.9
A10-FR01C/H	5.4
A16/A22/A37/A45/A56- *-R-01-B	3.5
A16/A22/A37/A45/A56- *-R-01-C	6.5
A16/A37/A56- *-R-01-H	7.9

A90	4.8	56
A100	5.2	62
A145	7.2	83

Series Variable Displacement Piston Pumps

■ Features

● High efficiency

The efficiency properties in case of “A16” pump are high efficiencies to be shown below.

● Low noise level

In the “A16” pump, the noise level is as low as 57.3 dB(A) [at the full cut-off pressure 21 MPa with speed 1500 r/min one meter horizontally away from pump head cover.]

“A16” Type Performance Characteristics

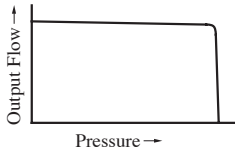

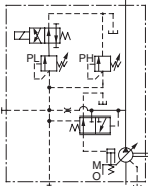

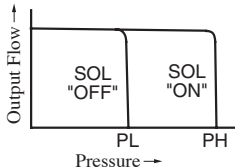

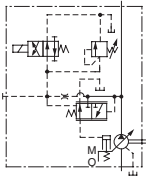

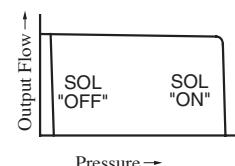

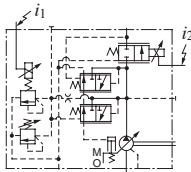

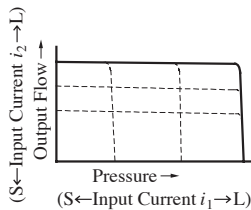

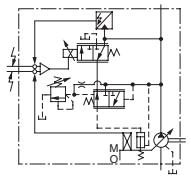

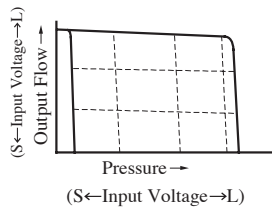

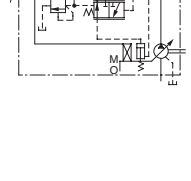

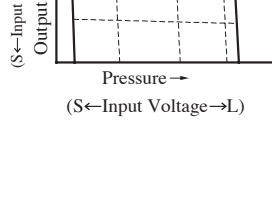

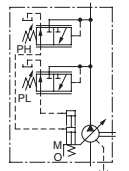

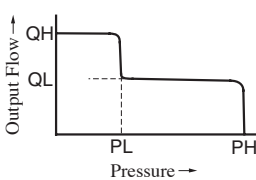

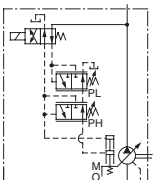

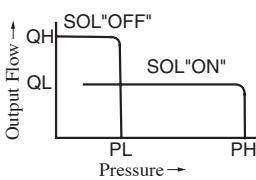

● Accomplishment of energy-saving

Because the overall efficiency is high and the cut-off characteristics is sharp, thus the input power may be saved.

● Low heat generation

Because of small power loss, it is possible to reduce the rise in oil temperature. Accordingly, capacity of a reservoir can be reduced.

Control Type

Control Type	Graphic Symbols	Performance Characteristics	Explanation	Page
"01" Pressure Compensator Type			When the system pressure increases and comes close to the preset cut-off pressure, the pump flow decreases automatically while maintaining the set pressure as it is.	A-28
"02" Solenoid Two Pressure Control Type			This type of control is ideal for an application where the output power of the actuator has to be controlled in two different load pressures while keeping the actuator speed nearly constant.	A-51
"03" Pressure Compensator with Unloading Type			It is suitable for a situation where a long unloading time is required and heat generation and noise have to be kept at their lowest levels. <ul style="list-style-type: none">• The pump can be used in combination with the multistage pressure control valve.	A-59
"04" Proportional Electro-Hydraulic Load Sensing Type			This is an energy-saving type control which regulates the pump flow and load pressure to be at absolute minimum necessary level to operate the actuator. Pump flow rate and cut-off pressure are controlled proportional to the input current to the control device on the pump and the input current is regulated by the specific amplifier.	A-60
"04E" Electro-Hydraulic Proportional Pressure & Flow Control Type			This type of control has the pressure sensor and tilt angle sensor in the pump. The pump is used with the external amplifier (amplifier is integrated into pump in case of "04EH"). Flow and pressure can be controlled in proportion to input voltage by only one control valve. The features has been greatly improved by electrical feedback of swash plate tilt angle correspond to flow rate and load pressure to control valve.	A-70
"04EH" Electro-Hydraulic Proportional Pressure & Flow Control Type (OBE Type)			The features has been greatly improved by electrical feedback of swash plate tilt angle correspond to flow rate and load pressure to control valve. <ul style="list-style-type: none">• Linearity of input characteristics is excellent and easy to set.• Hysteresis is lower, repeatability and reproducibility are fine.	A-79
"05" Two-Pressure Two-Flow Control Type by System Pres.			This type of control is suitable for an application like "Presses" where the changeover from rapid advance to feed is required just when the pressing (pressurizing) starts.	A-88
"06" Two-Pressure Two-Flow Control Type by Solenoid Valve			This pump control is suitable for machining found on machine tool, where machining starts after the changeover from rapid advance to feed has been made.	A-89

Control Type

Control Type	Graphic Symbols	Performance Characteristics	Explanation	Page
"07" Pilot Pressure Control Type Pressure Compensator			The pump is used in combination with the pilot relief valve or multistage pressure control valve. By controlling the pilot pressure, the full cut-off pressure can be remote-controlled according to your requirements.	A-90
"09" Constant Power Control Type			<ul style="list-style-type: none"> • Pump input power can be controlled in accordance with the motor output. • When the discharge pressure rise, the output flow decreases corresponding to the preset input power. • The pump can act for function of two pumps, low-pressure large-flow and high-pressure small-flow. Therefore, the motor capacity can be reduced. 	A-98
"00-Z500" Simple Two-Pressure Two-Flow Control Type			<ul style="list-style-type: none"> • This type of control enables one pump to act as two pumps (low-pressure and large-flow/high-pressure and small-flow-rate). Therefore, the motor capacity can be reduced. • When the system pressure increases near the preset "PL" pressure due to the load increase, the pump flow automatically decreases to "QL." • This type of control is suitable for an application like the press, where switching from rapid advance to feed is required just when the press (pressurizing) starts. • The PH pressure can be remote-controlled with a separately located relief valve. With this type of control, it is easy to change the applied pressure setting when materials or shapes of the press are changed. 	A-106

- ★1. Whenever setting pressure, make sure the full cut-off pressure never exceeds the maximum intermittent pressure.
- ★2. Care should be taken in cases of used at a higher pressure than the rated pressure, because operating terms may be restricted. For example, if used as per maximum illustrated operating conditions, intermittent time at maximum flow is restricted to under 1/5 of one cycle time and under six seconds simultaneously. Conditions may vary according to the actual working pressure and delivery (inclination angle of the swash plate). Consult factory or Yuken sales representative for further information.
- ★3. The table above shows specifications for using petroleum based oils. Pumps (customized design) for special fluids are also available. Their operating pressure and maximum shaft speed however differ from the values in the table above depending on the fluid type. Range of operating temperature and viscosities may differ from those of petroleum based oils due to their characteristics. Refer to the table below for details.

*1. Applicable only for "A70/90/145"

Specifications and Design numbers for Special Fluids

Type of Fluids	Pump Series	Operating Pressure MPa		Allowable Maximum Shaft Speed r/min		Temperature Range °C	Viscosity Range mm ² /s	Design Numbers for Special Fluid
		Rated	Intermittent	Rated	Max.			
Water-Glycols	A16,A22,A37,A56	14	16 (14) ^{★1}	1200	(1800) ^{★2}	0-50	20-200	3230
	A70,A90,A145	21	21					7030 [A70, A90] 6030 [A145]
	A100	16	16					2006

A56- * -R-01				
A70- * R01	Suction	F5-12-A-10	F5-12-B-10	F5-12-C-10
	Discharge	F5-08-A-10	F5-08-B-10	F5-08-C-10
A90- * R01	Suction	F5-16-A-10	F5-16-B-10	F5-16-C-10
A100- * R01	Discharge	F5-10-A-10	F5-10-B-10	F5-10-C-10
A145- * R01				

★ In case of using socket welding flanges, there is a case where the operating pressure should be set lower than the normal because of strength of the flanges. Therefore, please pay cautious attention to the operating pressure when the socket welding flanges are used.

● Details of the pipe flange kits are shown on pages A-258 and A-259.

Response Characteristics Change in Accordance with Circuits and Operating Conditions.

★1. Available to supply pump with anti-clockwise rotation. Consult Yuken for details.

Performance Characteristics

For performance characteristics, refer to models of pressure compensator type on page A-32 to A-34, A-36 to A-38 and A-40.

Pipe Flange Kits

For pipe flange, refer to form of pressure compensator type on page A-29.

Axial Port Type

Flange Mtg. : A16-F-R-02-K
A22-F-R-02-K

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. The pilot port provided is for connecting a control valve, if multistage pressure control is required.

Side Port Type

Port mounting dimensions are the same as those of pressure compensator model. Refer to page A-42 for port mounting dimensions.

Foot Mounting Type

Mounting bracket is common to that of pressure compensator model. Refer to page A-42 for the dimensions of mounting bracket.

Side Port Type

Flange Mtg. : A37-F-R-02-S-K

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. The pilot port provided is for connecting a control valve, if multistage pressure control is required.

● **Axial Port Type**

Port mounting dimensions are the same as those of pressure compensator model.
Refer to page A-43 for port mounting dimensions.

● **Foot Mounting Type**

Mounting bracket is common to that of pressure compensator model.
Refer to page A-43 for the dimensions of mounting bracket.

Side Port Type

Flange Mtg. : A56-F-R-02-S-K

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two drain ports at your option. Keep the remaining port plugged.
- ★3. The pilot port provided is for connecting a control valve, if multistage pressure control is required.
- ★4. Dimensions show surface of drain port.

● Axial Port Type

Port mounting dimensions are the same as those of pressure compensator model. Refer to page A-44 for port mounting dimensions.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model. Refer to page A-44 for the dimensions of mounting bracket.

Flange Mtg. : A70-FR02 *

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two drain ports at your option. Keep the remaining port plugged.
- ★3. The pilot port provided is for connecting a control valve, if multistage pressure control is required.
- ★4. Case drain port is available for use when draining hydraulic fluid from pump casing.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model.
Refer to page A-45 for the dimensions of mounting bracket.

Flange Mtg. : A90-FR02 *

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two drain ports at your option. Keep the remaining port plugged.
- ★3. The pilot port provided is for connecting a control valve, if multistage pressure control is required.
- ★4. Case drain port is available for use when draining hydraulic fluid from pump casing.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model.
Refer to page A-46 for the dimensions of mounting bracket.

Flange Mtg. : A145-FR02 *

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two drain ports at your option. Keep the remaining port plugged.
- ★3. The pilot port provided is for connecting a control valve, if multistage pressure control is required.
- ★4. Case drain port is available for use when draining hydraulic fluid from pump casing.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model.
Refer to page A-47 for the dimensions of mounting bracket.

★1. In case of using socket welding flanges, there is a case where the operating pressure should be set lower than the normal because of strength of the flanges. Therefore, please pay cautious attention to the operating pressure when the socket welding flanges are used.

★2. Discharge port for pump model "A16" and "A22" is available only the threaded connections.

● Details of the pipe flange kits are shown on pages A-258 and A-259.

Instructions

Bleeding Air

In order to get steadily controlled pressure and flow, bleed air by loosening the air vent screw and fill solenoid armature with operating oil.

Manual Adjustment Screws

Manual adjustment screws may be used for initial running adjustment or in case of electrical failures in order to adjust pressure and flow temporarily. In case of normal use, put the manual adjustment screws back in their preset positions.

Position of Cable Departure

Position of cable departure can be changed. For details, refer to drawing below.

Connection of Surge Cut-off Valve to "A" Series Pump (For A16 to A56 Type)

If using surge cut-off valve (SF1105-A-10), connect between pilot port "PP" of this pump and port "PP" of surge cut-off valve as pilot piping (refer to symbol below).

Inside diameter of pipe should be more than 8 mm.

Consult Yuken for details of surge cut-off valve.

- ★1. Whenever setting pressure, make sure the full cut-off pressure never exceeds the maximum intermittent pressure.
- ★2. When operating the pump exceeding the rated pressure, operating conditions are restricted.
Refer to page A-28 for details.
- ★3. Maximum flow differs to shaft speed.
The value listed above indicates shaft speed of 1800 r/min.
For other shaft speed calculate by the ratio of shaft speed.

Pipe Flange Kits

Pipe flange kits are available. When ordering, specify the kit number from the table below.

Pump Model Numbers	Name of Port	Pipe Flange Kit Numbers		
		Threaded Connection	Socket Welding [★]	Butt Welding
A 16- *R04E A 22- *R04E	Suction	F5-06-A-10	F5-06-B-10	F5-06-C-10
	Discharge	F5-06-A-10	F5-06-B-10	F5-06-C-10
A 37- *R04E A 45- *R04E A 56- *R04E	Suction	F5-10-A-10	F5-10-B-10	F5-10-C-10
	Discharge	F5-10-A-10	F5-10-B-10	F5-10-C-10
A 70- *R04E	Suction	F5-12-A-10	F5-12-B-10	F5-12-C-10
	Discharge	F5-08-A-10	F5-08-B-10	F5-08-C-10
A 90- *R04E A100- *R04E A145- *R04E	Suction	F5-16-A-10	F5-16-B-10	F5-16-C-10
	Discharge	F5-10-A-10	F5-10-B-10	F5-10-C-10

- ★ In case of using socket welding flanges, there is a case where the operating pressure should be set lower than the normal because of strength of the flanges. Therefore, please pay cautious attention to the operating pressure when the socket welding flanges are used.
- Details of the pipe flange kits are shown on pages A-258 and A-259.

Amplifiers for Electro-Hydraulic Proportional Pressure & Flow Control Type Pumps

SK1106-★-*-*-11**

Specifications

Model No.	SK1106-★-*-*-11**
Descriptions	
Applicable Coil Resistance	10 Ω (20°C)
Input Impedance	10 kΩ (PIN, QIN)
Power Supply	24 V DC (21 - 28 V Included Ripple)
Power Input (Max.)	30 W
Input Signal	Max. Flow / 5 V (QIN) Specified Pres. / 5 V (PIN)
Output Signal for Sensor Monitor	5 V / Max. Flow (SMQ) 5 V / Specified Pres. (SMP)
Ambient Temperature	0 - 50 °C
Approx. Mass	450 g

Detail of Connector

Connector	Name of Signal	
CN1 Solenoid	1	Output to pilot valve solenoid
	2	
CN2 Power Supply	1	0 [V] (0 V)
	2	+24 [V] (24 V)
	3	0 [V]
CN3 Pres. Sensor	1	+5 [V] Power Supply for Sensor
	2	0 [V]
	3	Input Signal - Sensor

	3	Input Signal - Sensor
	4	0 [V]
	5	—
CN5 Input/Output Signal	1	Input Signal - Flow (Qin)
	2	Input Signal - Common (COM)
	3	Input Signal - Pres. (Pin)
	4	Output Signal - Sensor Monitor P (SMP)
	5	Output Signal - Sensor Monitor Q (SMQ)
	6	0 [V]

■ Cable Connection Between Pump and Amplifier

The cable connections between the proportional pilot valve and the sensor of the pump and the attached amplifier (SK1106) are shown below.

■ Detail of Connector (Pump Side)

1. Pressure Sensor (HW090 connector 3-Pin (T-type) Sumitomo Wiring Systems, Ltd.)

Terminals No.

1. Power Supply (Color of mating connector Ass'y lead : Red)
2. Output(Color of mating connector Ass'y lead : White)
3. 0V(Color of mating connector Ass'y lead : Black)

2. Tilt Angle Sensor (J series connector<Mark II> 4-pin(174259-2) TE connectivity)

Terminals No.

1. Power Supply (Color of mating connector Ass'y lead : Red)
2. 0V (Color of mating connector Ass'y lead : Black)
3. Output (Color of mating connector Ass'y lead : White)
4. Shield wire

3. Solenoid (GDM-211-B-11:YUKEN)

Terminals No.

1. SOL Input (Color of mating connector Ass'y Lead : Red)
2. SOL Input (Color of mating connector Ass'y lead : White)
3. Not Used

■ Connector For Cable Ass'y

● Amplifier Side

MC1.5/*-ST-3.81
 (Phoenix Contact)

● Sensor Side

1. Pressure Sensor
 Type:HW090
 Housing : F (6189-0131)
 Retainer : F (6918-0326)
 Terminal : F (1500-0106)
 Wire seal : S (7165-0118)
 (Sumitomo Wiring Systems, Ltd.)

2. Tilt Angle Sensor
 Type : J Series
 Connector<Mark II>
 4-pin : (174257-2)
 (TE connectivity)

★1. Cable assemblies are available. When ordering, specify the cable Ass'y model numbers from the table below.

Name of Cable Ass'y	Cable Ass'y Model Numbers					
	Approx. Length of Cable (mm)					
	2000	5000	10000	15000	20000	25000
①For Solenoid	SK1112-S-2-11	SK1112-S-5-11	SK1112-S-10-11	SK1112-S-15-11	SK1112-S-20-11	SK1112-S-25-11
②For Power Supply	SK1112-V-2-11	SK1112-V-5-11	SK1112-V-10-11	SK1112-V-15-11	SK1112-V-20-11	SK1112-V-25-11
③For Pressure Sensor	SK1112-P-2-11	SK1112-P-5-11	SK1112-P-10-11	SK1112-P-15-11	SK1112-P-20-11	SK1112-P-25-11
④For Tilt Angle Sensor	SK1112-Q-2-11	SK1112-Q-5-11	SK1112-Q-10-11	SK1112-Q-15-11	SK1112-Q-20-11	SK1112-Q-25-11
⑤For Signal	SK1112-C-2-11	SK1112-C-5-11	SK1112-C-10-11	SK1112-C-15-11	SK1112-C-20-11	SK1112-C-25-11

★2. *1 connector for the solenoid (GDM-211-B-11) and *2 connectors for amplifier (MC1.5/*-ST-3.81) are already attached to the pump and the amplifier, respectively. If using the cable Ass'y, remove every attached connector before wiring.

Series Variable Displacement Piston Pumps, "OBE" Type Electro-Hydraulic Proportional Pressure & Flow Control Type

Performance Characteristics

- ★1. Unloading pressure when input signal is 0 V.
- ★2. Safety valve setting pressure

- Detail of Amplifier
- Connecting Terminal

Terminal	Name
P IN	Input Signal, Pressure (+)
C	Input Signal (COM)
Q IN	Input Signal, Flow (+)
SMP	Sensor Monitor Output, Pressure
SMQ	Sensor Monitor Output, Tilt Angle
0 V	Power Supply
24 V	
ALM S	Alarm Output
ALM C	Alarm Output (COM)
CH	Output Current Check (to COM)

- Note 1. For "SENSOR MONITOR" terminal, external instruments should have input impedance of more than 10 kΩ.
2. For "CH" terminal, external instruments should have input impedance of more than 10 kΩ.
3. Volume adjustment of "DITHER", "GAIN", "CMG", "FMG" and "LQC" is made at the time of shipment. Adjustment at the customer is not required.
4. Use shielded cable for "Input" connection. The ground of the shielded cable must be connected to input signal side.

- ★1. Whenever setting pressure, make sure the full cut-off pressure never exceeds the maximum intermittent pressure.
- ★2. When operating the pump exceeding the rated pressure, operating conditions are restricted.
Refer to page A-28 for details.

- ★1. Available to supply pump with anti-clockwise rotation. Consult Yuken for details.
- ★2. When A10 pump is used as the foot Mtg., order the Mtg. bracket kit shown below separately.
Refer to page A-17 for dimensions of the Mtg. bracket.

Mtg. Bracket Kit Numbers	Approx. Mass kg
LP-1A-10	2.2

Note: The mounting bracket kit consists of a mounting bracket, 2 hex. bolts and 2 plain washers.

Performance Characteristics

For performance characteristics, refer to models of pressure compensator type on page A-31 to A-34, A-36 to A-38 and A-40.

Pipe Flange Kit

For pipe flange, refer to form of pressure compensator type on page A-29.

Flange Mtg. : A10-FR07

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two suction and discharge ports at your option. Keep the remaining ports plugged.
- ★3. As the tightening torques of suction, discharge and drain port fittings, conform to the below.

Model Numbers	Tightening Torque Nm	
	Suction Port & Discharge Port	Drain Port
A10-FR07-12	65 - 75	40 - 50

Axial Port Type

**Flange Mtg. : A16-F-R-07-K
A22-F-R-07-K**

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two pilot ports at your option. Keep the remaining port plugged.

● **Axial Port Type**

Port mounting dimensions are the same as those of pressure compensator model. Refer to page A-42 for port mounting dimensions.

● **Foot Mounting Type**

Mounting bracket is common to that of pressure compensator model. Refer to page A-42 for the dimensions of mounting bracket.

Side Port Type

Flange Mtg. : A37-F-R-07-S-K

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two pilot ports at your option. Keep the remaining port plugged.

● Axial Port Type

Port mounting dimensions are the same as those of pressure compensator model. Refer to page A-43 for port mounting dimensions.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model. Refer to page A-43 for the dimensions of mounting bracket.

Side Port Type

Flange Mtg. : A56-F-R-07-S-K

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two pilot and drain ports at your option.
Keep the remaining ports plugged.

● **Axial Port Type**

Port mounting dimensions are the same as those of pressure compensator model. Refer to page A-44 for port mounting dimensions.

● **Foot Mounting Type**

Mounting bracket is common to that of pressure compensator model. Refer to page A-44 for the dimensions of mounting bracket.

Flange Mtg. : A70-FR07S

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two pilot and drain ports at your option. Keep the remaining ports plugged.
- ★3. Case drain port is available for use when draining hydraulic fluid from pump casing.

● Foot Mounting Type

Mounting bracket is common to that of pressure compensator model.
Refer to page A-45 for the dimensions of mounting bracket.

Flange Mtg. : A90-FR07S

- ★1. Install the pump so that the "Filling Port" is at the top.
- ★2. Use either port of two pilot and drain ports at your option. Keep the remaining ports plugged.
- ★3. Case drain port is available for use when draining hydraulic fluid from pump casing.

● **Foot Mounting Type**

Mounting bracket is common to that of pressure compensator model.
Refer to page A-46 for the dimensions of mounting bracket.

Flange Mtg. : A145-FR07S

	Discharge	F5-08-A-10	F5-08-B-10	F5-08-C-10
A145- *-R-09	Suction	F5-16-A-10	F5-16-B-10	F5-16-C-10
	Discharge	F5-10-A-10	F5-10-B-10	F5-10-C-10

*1. In case of using socket welding flanges, there is a case where the operating pressure should be set lower than the normal because of strength of flanges. Therefore, please pay cautious attention to the operating pressure when the socket welding flanges are used.

*2. Discharge port for pump model "A16" is available only the threaded connections.

● Detail of the pipe flange kits are shown on pages A-258 and A-259.

Note) ★: Minimum adjustment flow of relief valve, which is for setting with PH pressure. (Relief valve is external set.)

Performance Characteristics

Graphic Symbol

Instruction

As the pump does not have full cut-off function, setting relief valve of PH pressure (maximum pressure on circuit) for pump discharge line is absolutely required.
